Connecting Technology with Education!

Technology needs are a constantly shifting, ever-present challenge in the world of education. ESD 105 is proud to offer contracted services to help meet those needs through our many offerings in IT Source 105. Our goal is to provide skilled, efficient, and targeted services for your school at an affordable cost, including desktop support, system and network management, and integration of new technologies such as tables and 1-1 computing. We understand what makes tech work for schools and how far dollars have to stretch.

**Technology Support**
- Onsite help desk, remove access, and phone support
- Tech fixes and troubleshooting
- Hardware and software installation
- Convenient help ticket system

**Network Support**
- Routers, switches, and other networking gear
- WiFi installation and management
- K-20 setup and troubleshooting

**System Support**
- Server maintenance, installation, and software upgrades
- Web filters, data backup solutions, system monitoring, and battery backups
- Integration and planning for new systems such as mobile devices, VOIP, labs, etc.

**Planning and Leadership**
- Monthly meetings with district leadership teams for technology planning
- Free basic level technology review
- Guidance in developing an ongoing technology plan
- Assistance with research and implementation of new technology initiatives
- Liaison with OSPI and WSIPC to leverage resources and purchasing power
- Consultation on educational technology initiatives

**Why IT Source?**
- We do education only. No business or private institutions.
- As a service of ESD 105, we have access to all the resources and personnel and experience of the ESD
- ESD 105 is a not-for-profit agency. We work to serve the schools.
- We offer a flexible and affordable cost model.

If you have a need in educational technology, contact your team at IT Source 105. We’ll make a plan to fulfill it.
