Instructions (Read Aloud to Students)

Today I would like to ask you to help us evaluate our prevention and intervention program. We are asking students to complete a Program Evaluation Form before and after they participate in counseling or support groups. This survey asks you several questions about your feelings and the things you do. Your answers will help show us if our program is effective.

This Program Evaluation Form is voluntary and confidential. You are not required to complete it, but if you do it will help us a great deal in determining if we are making a difference. When you are done, I will have you place your answer sheet into this envelope so no one can see your answers.

I will send this envelope to RMC Research in Portland, Oregon, for processing. RMC Research will create reports summarizing what students in this school and around the state say about the program.

(Read at Pre-Test) *If this is the first time you are completing this Program Evaluation Form please be honest. If you are less than honest with the answers to these questions and then answer the Program Evaluation Form given to you at the end of our program with more honest answers, it will significantly alter the data we get from RMC.*

Please be honest and answer the questions to the best of your ability so that we may produce reports that tell us if this program is helpful to students like yourself.

Once again, these questions are completely confidential and are not ever shared with school staff or any others!
